# The Cultivation Period

## Plan A: Cultivation Period

During the initial 30 days of a new member's journey, it's vital to provide support, education, and motivation.

Imagine it as tending to a seed, requiring nurturing to flourish – hence the term "Plan A," the Cultivation Period.

- ✓ The Cultivation Period encompasses the initial 30 days after your new member joins. It happens when your diligent coaching, mentoring, and inspiration are rewarded as you guide these members toward success. During the Cultivation Period, you have 3 sources of income.
- ✓ If your member is within their first 30 days, their Personal Volume (PV) is calculated under Plan A. If they've surpassed the 30-day mark, their PV is calculated within your Plan B. Your commissions are based on the Commission Points (CP) earned from each purchase.
- ✓ BioKissed's system automatically determines whether a member is within or beyond their first 30 days.

**Plan A:**  
Cultivation Period

# The Harvest Period

## Plan B: Harvesting Period

Once this initial phase is complete, the new member's personal volume transitions to "Plan B," known as the Harvesting period.

Your ongoing coaching and support play a pivotal role, and you'll reap the rewards for guiding others to success, much like cultivating plants in ideal conditions, leading to a bountiful harvest to savor.

- ✓ Once your member crosses the 30-day threshold, their PV is calculated under Plan B, The Harvesting, along with the associated CP. As your organization grows, here's where your passive income potential starts to flourish.
- ✓ In Plan B, there are 6 sources of income to tap into.

- ✓ With the Heartbeat Bonus, you will earn considerably more from each level, when compared with what you earn from a single line.

## The Difference of Higher Commission on Deper Levels

- ✓ BioKissed is breaking the mould by offering a higher commission percentage the deeper the level, whereas most other network marketing companies offer a lower percentage the deeper the level.
- ✓ In this simulation, you can see the difference in earnings when working with a higher percentage than the reverse.
